

OPTIMIZING THE POWER OF MICROSOFT EXCEL IN HR

29-30 JUL 2026 | 17-18 AUG 2026 | 3-4 SEP 2026
9.00AM - 5.00PM
ONLINE VIA MICROSOFT TEAMS

Course Overview

If you are a HR Professional, you will likely have the tasks of managing and executing its various functions e.g. compensation and benefits, recruitment processes, performance management and training & development. In managing these tasks, many practitioners do not realize the full potential of Microsoft Excel and how extensively this tool can help to get the work done efficiently. This 2 days hands-on training will equip participants with the knowledge and skills of Microsoft Excel as an important tool to enhance work efficiency and improve HR management.

Who Should Attend

The course is relevant to HR Professional who wishes to optimize the power of Microsoft Excel in HR.

Prerequisites

- Participants are expected to have the basic knowledge of Microsoft Excel prior to attending this course.

Course Structure

Time	Agenda
9.00AM - 12:30PM	Module 1: Constructing a HR framework with Excel Tables Getting your Data Entry Right! Ensure data entry is easier by using Excel Tables. The dynamics of Excel table will enable user to fill and update formulas automatically. This will allow user to structure, view and present data systematically. Module 2: Formatting your Data Systematically Learn to construct a standardized format in your HR Application. Apply the flexibility and the dynamics in entering date format, numerical format, placing of decimals and other formatting features.
12.30PM - 1:30PM	Lunch Break
1:30PM - 5.00PM	Module 3: Data Validation in HR Understand the way how Data Validation is applied in various HR scenarios and how a HR Practitioner can apply interactive dropdown list, set criterion, limits and rules on what data a user can enter in Excel table. Module 4: Analysing Data Manage, organize and summarize data based on your criteria with the Sort and Subtotal features. You may filter and set criterion to extract data that you intend to analyse using the Auto Filter and Advanced Filter features. Module 5: Functions and Formulas in HR Extend the use of critical formulas in enhancing work efficiency by understanding Excel Relative Reference, Absolute Reference, Name Range, Sum, Average, Max, Min, Count, SumIf, CountIf, If, And, Or VLookup and the date functions in managing HR tasks.
DAY 2	
9.00AM - 12:30PM	Module 6: Creating Chart Presentations Learn the basics of charts and determine which charts are relevant in different scenarios. Apply the skills in modifying, adjusting chart and the layouts for an impressive presentation.
12.30PM - 1:30PM	Lunch Break
1:30PM - 5.00PM	Module 7: Summarizing HR Data with PivotTable Gathering and reporting data is often an important function within organizations, particularly for HR. PivotTable makes HR tasks far more meaningful and easier in managing volumes of data: salary, compensation, bonuses, head-counts, etc. An interactive PivotTable will enable you to analyse data and produce reports on a regular basis. You will also learn to build PivotChart to visually represent PivotTable data. Module 8: Confidentiality and Data Protection in HR Management Data Security and confidentiality are the most issues in HR. Learn to safeguard data and information by setting different levels of security measures available in Excel.
